Ref. No. *Session 2024-25*

Date .....

**Implementing Flipped classroom teaching for Students in the session 2024-25**

The Department of Botany, Physics and History has implemented the flipped classroom technique as a teaching method for students. This innovative approach involves students independently exploring new concepts and material through live demonstration, prerecorded lectures, videos and multimedia resources outside of traditional class time. The students are encouraged to get engaged with the content at their own pace and then participate in interactive discussions, collaborative activities and problem solving exercises under the guidance of the teachers during in person class sessions. This method aims to promote active learning, critical thinking and student engagement in the educational process.
